***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

2. The IDS, filed 1-13/04, has been considered in full.

***Oath/Declaration***

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

***Drawings***

4. The drawings, as originally filed, are acceptable as formal.

***Specification***

5. The abstract of the disclosure is objected to because it should avoid phrases which can be implied such as "The invention relates to".

***Claim Objections***

Art Unit: 3682

6. Claim 1 is objected to because of the following informalities: In claim 1, line 2, Applicant recites "at least two nuts". Then later in the same claim, Applicant introduces a third nut. It seems inaccurate to claim at least two when the claim requires at least three. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, "away against the screw" is indefinite since it is not clear how the head is actually moving.

Claim 8 is indefinite in its entirety. It is not clear what this claim requires.

Claim 9, "i.e." is indefinite since it is an example and it is unclear if this is being claimed.

Claim 9 is written in the alternative which is indefinite. It is not clear what is being claimed.

***Claim Rejections - 35 USC § 102***

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-9, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1 283 384 A2 (cited by Applicant).

EP 1 283 384 A2 shows the claimed invention (e.g. figure 5) where a failsafe screw and nut system has three nuts (8, 20 in fig 5 (24 in fig 6) with balls therebetween (26) and different clearances (inherent) with a pin (28) which will conduct electricity (static) and doesn't when broken.
